

Tasking Memorandum No. 99-105

Memorandum For Commanders, DCMDW and DCMDE

Subject: World Wide Web Industrial Capabilities Assessment Program (WICAP)
(TASKING)

Date: February 5, 1999

Suspense Date: Contingent upon DLSC Request

Target Audience: Commanders of CAOs cognizant of suppliers identified below, All other interested DCMC personnel

Requirement(s):

The Defense Logistics Support Command (DLSC) Industrial Support Team (PON) developed WICAP, an automated data collection and analytical tool, to facilitate identification of true industrial limitations. It will provide DLSC with unprecedented insight into industrial shortfalls and help focus DLA investment decisions and acquisition strategies, DLSC is in the process of asking nine suppliers to participate in a functional test. Suppliers that have been tentatively identified for participation in the WICAP program will be contacted through the responsible CAO. They are as follows:

- General Electric, Lynn, MA
- General Electric, Cincinnati, OH
- Pratt & Whitney, East Hartford, CT
- Laumann Mfg, Ronkonkoma, NY
- Lockheed Martin Aeronautical Systems, Marietta, GA
- Lockheed Martin, Fort Worth, TX
- Globe Mfg, Wichita, KS
- Boeing, St. Louis, MO
- Boeing Defense & Space Group, Seattle, WA

The DCMC offices cognizant of those suppliers are to assist DLSC in arranging meetings with them so that DLSC can demonstrate the product. The functional test will run through the late spring of FY99. After the conclusion of functional testing, the WICAP program will be expanded to allow additional suppliers to participate.

Both the DLA Director and DCMC Commander are very supportive of this program. To this point, potential industry participants that have been introduced to WICAP have expressed strong interest in participating.
